What our customers are saying:

“We have had a joint partnership with the college for over 3 years now for our Supervisory and Leadership program and also other various employment training. David and Bob (Workforce Training Instructors) have been great! They work hard to create curriculums and classes that will fit our needs as an organization. The instructors really empower and engage our employees in the classes and this in turn motivates them! This partnership with the college allows us to gain training we need for our employees while keeping much of our training local in the community. We have been happy with the service and will continue with future training!”

– Renee’ H. Maiorano, Compensation Manager, Cape Fear Public Utilities

“Companies that offer comprehensive training programs have 218 % higher revenue per employee than companies without formalized training”. – Association for Talent Development
